Protecting your farm involves a number of considerations – family members, co-workers or employees, buildings, equipment, livestock, and crops. Planning ahead for all-hazard situations can help to minimize the impact and speed the recovery process for you and your farm.

Before a Disaster or Emergency

- **Gather information.**
  - What disasters or hazards are most likely in your community? For your farm?
  - How would you be warned?
  - How should you prepare for each?

- **Know the warning signals for your area.**
  - Learn the warning systems for your community.
  - Are you able to hear or see the appropriate warning from your farm?

- **Stay alert for emergency broadcasts.**
  - Emergency Alert System broadcasts on radio or television
  - NOAA weather radio alerts
  - News sources – radio, television, internet

- **Put together an emergency supply kit for your family.**
  - See ‘Family Emergency Supply Kit’ handout

- **Draw a farm site map and indicate:**
  - Buildings and structures
  - Access routes (e.g., roads, lanes)
  - Barriers (fences, gates)
  - Locations of livestock
  - Locations of all hazardous substances
  - Electrical shutoff locations, etc.

- **Make a list of your farm inventory, include:**
  - Livestock (species, number of animals)
  - Crops (acres, type)
  - Machinery and equipment (make, model #)
  - Hazardous substances (e.g., pesticides, fertilizers, fuels, medicines, other chemicals)

- **Keep a list of emergency phone numbers.**
  - Your local and state veterinarian
  - County extension service
  - Local emergency management
  - Insurance agent

- **Make a list of suppliers or businesses providing services to your farm.**
  - Livestock or milk transport, feed delivery, fuel delivery, etc.

- **Contact your insurance agent.**
  - Review your insurance coverage.
  - Get additional coverage for “all-hazard” situations (e.g., flood, hail damage).

- **Stockpile supplies needed to protect the farm:**
  - Sandbags and plastic sheeting, in case of flood
  - Wire and rope to secure objects
  - Lumber and plywood to protect windows
  - Extra fuel for tractors and vehicles
  - Hand tools for preparation and recovery
  - Fire extinguishers in all barns and all vehicles
  - A safe supply of food to feed livestock
  - A gas powered generator

- **Identify areas (e.g., higher elevation) to relocate your assets, if needed.**
  - Livestock and horses
  - Equipment
  - Feed, grain, hay
  - Agrochemicals (pesticides, herbicides)

- **Remove or secure any loose equipment or materials, such as lumber and fuel tanks.**

- **Prepare farm employees.**
  - Keep them informed of the farm’s emergency plan; review it with them regularly.
  - Identify shelter-in-place or evacuation locations.
  - Establish a phone tree with contact information for all employees.
